OSAMA KHALED

Front End Developer - ReactJS

Dakahlia, Mit Ghamr | @wahtsapp | @gmail | @portfolio

SUMMARY

I am front-end developer leveraging modern JavaScript tools/frameworks including ReactJS to create responsive websites and web applications.
I am constantly learning new languages and tools that will enable me to present a better website than just relying on the knowledge I already have.

SKILLS

HTML	ReactJS	Tailwind	Swiper
CSS	Redux & Redux Toolkit	Chakra UI	Git & Github
JavaScript	Sass	Framer Motion	Vite
JQuerry	Bootstrap	Styled Components	

EDUCATION

Bachelor's in information systems   **2018 - 2022**

Delta academy mansoura

PROJECTS

Portfolio

- A portfolio includes responsive design, and a personalized look inside my web development path.
- It showcases my skills and desire for making appealing web experiences.

E-Store

- E-commerce platform built with React.js, presenting a user-friendly interface for online shopping.
- Utilized Chakra UI to create responsive, accessible, and performant user interfaces.
- Redux was used as a database to hold user account information, wishlist items, and cart contents.
- Each account has its own data.

Journey

- Implemented responsive design principles to ensure accessibility across various devices, providing an optimal viewing experience for all visitors.

Constructs

- An online portfolio for a straightforward website development and construction company that includes a detailed history of the business and an overview of the services offered
